

N100 Financial Intelligence Platform

Analyst Guide

Project Overview

The N100 Financial Intelligence Platform analyzes NIFTY 100 companies using Python, SQLite, Pandas, SQL, and Streamlit. It provides financial analytics, screening, valuation, portfolio analysis, and reporting.

Objectives

- Financial statement analysis
- Ratio calculation
- Company comparison
- Portfolio construction
- Valuation analysis
- Interactive dashboard

Technology Stack

Python, Pandas, SQLite, SQL, Streamlit, Git, VS Code

Database Tables

companies, analysis, balancesheet, cashflow, profitandloss, documents, prosandcons

Dashboard Modules

Home, Company Profile, Stock Screener, Peer Comparison, Trend Analysis, Sector Analysis, Capital Allocation, Reports

Generated Reports

valuation_flags.csv, valuation_summary.xlsx, qa_summary.csv, final_submission_report.csv

Conclusion

The project successfully integrates data engineering, financial analytics, dashboard visualization, quality assurance, and reporting into a complete financial intelligence platform.
