

Portfolio Performance Report

Bluestock Fintech MJ28 - N100 Financial Intelligence Platform

This report summarizes the portfolio analytics module developed as part of the major project. It demonstrates portfolio allocation, investment performance, profitability analysis, and dashboard integration.

Metric	Value
Total Companies	7
Total Investment	■615,000
Current Portfolio Value	■660,000
Overall Profit	■45,000
Average Return	7.32%
Portfolio Health	Good
Risk Level	Moderate

Key Features

- Interactive Streamlit Portfolio Dashboard
- Portfolio allocation visualization using Plotly
- Investment, current value, profit and return analysis
- AI-based Buy/Hold/Sell recommendation support
- FastAPI backend integration
- Financial Intelligence Platform compatible output

Conclusion

The portfolio module successfully provides investment insights, performance tracking, and visualization capabilities. It complements the analytics and AI dashboards implemented during Sprint 6 and is ready for project demonstration.
